Management's Discussion and Analysis For the Nine Months ended December 31, 2013

This Management's Discussion and Analysis ("MD&A") for Gold Reach Resources Ltd. (the "Company" or "GRV") has been prepared by management dated February 19, 2014 and provides information on the Company's operations for the nine months ended December 31, 2013 and to the date of this report. This discussion and analysis should be read in conjunction with the unaudited Condensed Consolidated Interim Financial Statements for the nine months ended December 31, 2013 and the audited Consolidated Financial Statements for the year ended March 31, 2013.

Business of the Company

The Company was incorporated in November 1965 and is engaged in the exploration and development of mineral properties hosting copper, gold, silver and molybdenum prospects located in central British Columbia. The Company continues to evaluate acquisition of additional mineral interests in Canada.

Overall Performance

EXPLORATION - OOTSA PROPERTY

The Company presently owns 67,554 hectares comprised of 97 claims in its Ootsa Property which contains the Seel and Ox deposits.

2013 Ootsa Exploration Program

Gold Reach conducted another significant field exploration program at Ootsa between May 22 and November 29, 2013. This work included diamond drilling, collecting 1330 soil samples, stream sediment and rock grab sampling, geologic mapping and 76 line kilometres of geophysical surveying. A total of 90 holes were drilled at the Ox deposit for 17,372 metres of drilling, and 53 holes were drilled at Seel for 16,887 metres of drilling.

On January 13, 2014 a new open pit constrained resource update was announced for the Ox deposit based on 28,361 meters of drilling in 134 holes. The pit constrained resource at a 0.2% Cu Eq. cut off contains a measured plus indicated resource of 37.6 million tonnes grading 0.21% Cu and 0.027% Mo (0.33% Cu Eq.) plus an inferred resource of 12.2 million tonnes grading 0.18% Cu and 0.021% Mo (0.28% Cu Eq.). At a 0.2% Cu Eq. cut off 95% of the global measured and indicated resource is contained within the pit constrained resource, demonstrating the geometry of the near surface mineralized zone is favorable for potential exploitation by open pit methods.

OX PIT CONSTRAINED CONTAINED METALS AT 0.2% CU EQ. CUT OFF

Element	Measured and Indicated	Inferred
Copper	174,169,596 pounds	48,334,146 pounds
Molybdenum	22,393,234 pounds	5,638,984 pounds
Gold	48,380 ounces	11,748 ounces
Silver	1,850,552 ounces	512,991 ounces
Cu Eq.	273,695,080 pounds	75,186,450 pounds

Using a 0.2% Cu Eq. cut off the new Ox pit constrained resource contains 174.2 million pounds of copper and 22.4 million pounds of molybdenum in the measured and indicated category plus 48.3 million pounds of copper and 5.6 million pounds of molybdenum in the inferred category.

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

Drilling in 2013 has extended the Ox Deposit roughly 200 metres to the east on the north end where a large zone of near surface mineralization has been defined. Select drill highlights from the 2013 Ox drill program are summarized in the table below.

Summary of select Ox Holes Drilled in 2013

Drill Hole	From (m)	To (m)	Width	Cu %	Mo%	Au g/t	Ag g/t	Cu Eq.%**
		. ,	(m)*					-

^{*}Width refers to drill hole intercepts, true widths have not been determined.

On February 18, 2014 a new open pit constrained resource update was announced for the East and West Seel deposits based on 83,810 meters of drilling in 199 holes. At a 0.2% copper equivalent cut off the Seel pit constrained resources contain 116.3 million tonnes grading 0.21% Cu, 0.16 g/t Au, 0.017% Mo, and 2.56 g/t Ag (0.38% copper equivalent) in the measured and indicated categories and another 211.4 million tonnes grading 0.18% Cu, 0.12 g/t Au, 0.021% Mo, and 2.29 g/t Ag (0.34% copper equivalent) in the inferred category. A total of 92% of the global measured and indicated resource is contained within the open pit constrained resource at a 0.2% copper equivalent cut off. At a 0.4% copper equivalent cut off the pit constrained resource contain 39.8 million tonnes at 0.54% copper equivalent in the measured and indicated categories and 51.6 million tonnes at 0.49% copper equivalent in the inferred category. This is a significant tonnage of higher grade material sitting within the constraining pit outline.

^{**}Cu Eq. (copper equivalent) has been used to express the combined value of copper, molybdenum, gold and silver as a percentage of copper, and is provided for illustrative purposes only. No allowances have been made for recovery losses that may occur should mining eventually result. Calculations use metal prices of US 2.50/lb copper, 1200/oz gold, 15 silver, and 10/lb molybdenum using the formula Cu Eq.% = Cu% + (Au g/t x 0.701) + (Ag g/t x 0.0087) + (Mo% x 4.01).

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

SEEL PIT CONSTRAINED CONTAINED METALS AT 0.2% CU EQ. CUT OFF

Element	Measured and Indicated	Inferred
Copper	538,620,000 pounds	838,863,000 pounds
Molybdenum	43,603,000 pounds	97,867,000 pounds
Gold	598,500 ounces	816,000 ounces
Silver	9,575,500 ounces	15,564,000 ounces
Cu Eq.	974,646,000 pounds	1,584,520,000 pounds

Using a 0.2% Cu Eq. cut off the new Seel pit constrained resource contains 538.6 million pounds of copper, 43.6 million pounds of molybdenum, 0.6 million ounces of gold and 9.58 million ounces of silver in the measured and indicated categories plus 838.9 million pounds of copper, 97.9 million pounds of molybdenum, 0.8 million ounces of gold, and 15.56 million ounces of silver in the inferred category.

Drilling in 2013 has defined a higher grade core at the East Seel deposit and also shows that near surface mineralization on the north side of West Seel remains open for expansion. Select drill highlights from the 2013 Ox drill program are summarized in the table below.

Summary of select East Seel Holes Drilled in 2013

Drill Hole	From (m)	To (m)	Width	Cu %	Au g/t	Ag g/t	Mo %	Cu Eq.%**

^{*}Width refers to drill hole intercepts, true widths have not been determined. EOH = end of hole.

The Company is very pleased to see that initial infill drilling on the large West Seel deposit has identified some very strong near-surface mineralization, with localized zones returning high gold, silver, and molybdenum grades. This near surface zone of higher grade mineralization has been intercepted in numerous drill holes over about 200 metres width. The West Seel deposit contains a large area containing Cu-Au-Mo-Ag mineralization which still remains open to the north and south. Select drill results from the 2013 drilling program are summarized in the table below.

Summary of select West Seel Holes Drilled in 2013

Drill Hole	From (m)	To (m)	Width (m)*	Cu %	Au g/t	Ag g/t	Mo %	Cu Eq.%**

AURO PROPERTY

The Company retains a 2% net smelter return royalty on the Auro and Auro South properties and New Gold Inc. has committed to spend Cdn. \$1,500,000 on exploration expenditures on the Claims over the next 3 years spanning the Calendar years 2012 through 2014.

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

MINERAL PROPERTIES - Ootsa

The Company owns a 100% interest in the Ootsa property, located in central British Columbia, comprised of 97 mineral claims totalling 67,554 hectares. Of these 97 mineral claims, 14 claims totalling 575 hectares, known as the Ox claims, are subject to a 2% NSR. The purchase agreement with the vendor, Silver Standard Resources Inc., ("Silver") entitles the Company to purchase 50% of the 2% NSR from Silver at any time by the payment to Silver of \$500,000. The Company may purchase the remaining 1% NSR at any time by payment to Silver of an additional \$1,000,000. There are 4 other claims totalling 2,600 hectares, known as the Seel claims that are subject to a 1% NSR. The Company is entitled at any time to purchase 50% of this 1% NSR for \$1,000,000. There is an associated Area of Interest with these claims, defined as the area lying within a distance of 1 kilometre from the external boundaries of the claims. The remaining 79 mineral claims were acquired by staking.

The technical content in this MD&A has been reviewed and verified by Dr. Shane Ebert, a qualified person, as defined by National Instrument 43-101. Dr. Ebert is also a director and President of the Company.

Results for the 3rd Quarter Ended December 31, 2013

All comparative 2012 amounts are for the three months ended December 31, 2012. The Company's administrative expenditures for the three months ended December 31, 2013 were \$617,270 (2012 – \$399,026) and included share based payments of \$320,745 (2012 - \$147,030), management costs of \$100,907 (2012 - \$114,062), professional fees of \$29,385 (2012 - \$37,184) reflecting the increases in the exploration support activities during the period, travel and promotion costs of \$54,754 (2012 - \$32,874) and investor relations of \$46,173 (2012 - \$29,791).

Investing activities associated with the exploration of the Ootsa Property were \$6,059,162 (2012 – \$7,780,865) for the nine months ended December 31, 2013.

Liquidity and Capital Resources

As an exploration stage company, the Company's liquidity position decreases as mineral exploration and evaluation expenditures plus administrative expenses are incurred. To mitigate this liquidity risk, the Company budgets both exploration and administrative expenditures and closely monitors its liquidity position. The Company's cash position as at December 31, 2013 was \$281,416 (March 31, 2013 - \$2,762,804). In early February 2014 the Company received \$1,891,030 plus interest of \$14,963 as part of the British Columbia Mining Tax Credit ("BCMETC") program. This cash receipt enabled the Company to significantly increase its working capital.

The Company intends, if possible, to raise further financing by way of equity issuances, applying for refundable tax credits or private loans in order to meet its exploration and working capital requirements as and when needed.

During the three months ended December 31, 2013 there were no exercises of any stock options. There were 1,627,400 share purchase warrants exercised for gross proceeds of \$1,464,660 during the three months ended December 31, 2013.

Financial Instruments

All financial instruments, including derivatives, are included on the Company's balance sheet and measured at either fair value or amortized cost.

Management's Discussion and Analysis
For the Nine Months ended December 31, 2013

The Company's financial assets consist of cash, cash equivalents and other receivables. The Company's financial liabilities consist of trade accounts payable and other liabilities, promissory notes payable and due to related parties, which are designated as other financial liabilities and measured at amortized cost.

The carrying values of the Company's financial instruments measured at amortized costs approximate their fair values due to their short-term nature.

The Company does not have any instruments measured at fair value.

The types of the risk exposure and the ways in which such exposures are managed are provided as follows

Foreign Exchange Risk

Foreign exchange risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. As at December 31, 2013, the Company holds no foreign currencies and is not exposed to any currency risk arising from fluctuation in foreign exchange rates.

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company's cash and receivables are exposed to credit risk. Given the minimal amounts of these instruments, The Company is not exposed to any significant credit risk as at December 31, 2013.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Included in the loss for the year in the consolidated financial statements is interest income on Canadian dollar cash. As at December 31, 2013, the Company is exposed to an interest rate risk on the interest income on its cash and cash equivalents. After taking into account the expected consumption of a portion of the principal from the internal funding of ongoing operations and expected exploration and evaluation expenditures The Company considers its interest rate risk as minimal and immaterial and does not enter into any interest rate hedging contracts.

The Company has no interest-bearing debt with long-term maturities and therefore considers this risk to be immaterial. The Company does not use derivative instruments to reduce its interest rate risk as the Company's management believes that the likely financial impact of interest rate changes does not justify using derivatives.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liability. The Company manages liquidity risk by maintaining sufficient cash balances to enable settlement of transactions on the due date. Accounts payable and accrued liabilities are current. The Company addresses its liquidity through equity financing obtained through the sale of common shares and the exercise of warrants and options. Additional capital was successfully obtained during the period to increase liquidity.

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

Share Data

In December 2013 the Company closed an offering of 338,000 units. Each unit comprised of one common share and one half of a share purchase warrants exercisable at \$1.50 per whole warrant at any time prior to December 16, 2014. In addition, during the nine months ended December 31, 2013 the Company granted a total of 407,083 additional stock options of which 127,510 options entitle the holders thereof to purchase at any time prior to September 3, 2018 one common share at \$1.30 per share and of which 279,573 entitle the holders thereof to purchase at any time prior to October 28, 2018 one common share at \$1.30 per share.

As of February 19, 2014 the Company had 35,531,090 common shares issued and outstanding, 3,519,309 options issued and outstanding, 2,424,500 share purchase warrants issued and outstanding, 14,000 finders' warrants issued and outstanding resulting in a fully diluted shares position of 41,488,899 shares.

Related Party Transactions

The Company incurred the following transactions with companies controlled by directors of the Company:

	For the nine months ended December 3				
		2013		2012	
Consulting and geological fees - mineral property costs	\$	100,000	\$	127,000	
Professional fees - legal		6,784		24,785	
Professional fees - administration		24,300		24,300	
Management and administration		193,000		163,500	
Rent/management charged to a company with mutual directors		(34,434)		(44,631)	
	\$	289,650	\$	294,954	

Key management personnel compensation comprised:

	For the nine months ended December 31,				
		2013		2012	
Management fees	\$	324,084	\$	294,954	
Share-based payments		361,640		-	
	\$	685,724	\$	294,954	

Non-key management personnel compensation comprised:

	For	For the nine months ended December 3				
			2012			
Directors fees	\$	15,500	\$	24,000		

The above transactions, occurring in the normal course of operations, are measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements and does not contemplate such arrangements in the foreseeable future. There are no contingent liabilities.

Critical Accounting Estimates

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

(a) Rehabilitation Provisions

Rehabilitation provisions have been created based on the Company's internal estimates. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period.

Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs which will reflect the market conditions at the time of the rehabilitation costs are actually incurred.

Included in Mineral Exploration and Evaluation Costs as at December 31, 2013 are the Company's aggregate reclamation bonds posted with the Mining and Minerals Division of the British Columbia Government in the amount of \$147,400 (March 31, 2013 - \$97,400). Subsequent to December 31, 2013 the Company increased its reclamation bond in the amount of \$15,000 thereby bringing the total of the posted bonds to \$162,400.

The bonds cover the future site restoration costs with respect to the Seel and Ox Lake Claims, collectively known as the Ootsa Property. All or part of the \$162,400 can be recovered subject to the inspection of the sites and assessment of the restoration costs by the Mining and Minerals Division of the British Columbia Government.

(b) Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the profit or loss in the period the new information becomes available.

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

(c) Title to Mineral Property Interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Future Accounting Policies

The following new standards, interpretations and amendments, which have not been applied in these financial statements, will or may have an effect on the Company's future financial statements:

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments is part of the IASB's wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015. The Company is in the process of evaluating the impact of the new standard on the accounting for the available-for-sale investment.

- IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine

In IFRIC 20, the IFRS Interpretations Committee sets out principles for the recognition of production stripping costs in the balance sheet. The interpretation recognizes that some production stripping in surface mining activity will benefit production in future periods and sets out criteria for capitalizing such costs. While the Company is not yet in the production phase, the Company is currently assessing the future impact of this interpretation.

Disclosure Controls and Procedures

In connection with National Instrument 52-109 (Certificate of Disclosure in Issuer's Annual and Interim Filings) ("NI 52-109") the Chief Executive Officer and Chief Financial Officer of the Company have filed a Venture Issuer Basic Certificate with respect to the financial information contained in the audited consolidated financial statements and this accompanying interim MD&A (together the "Interim Filings").

In contrast to the full certificate under NI 52-109, the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information the reader should refer to the Venture Issuer Basic Certificates filed by the Company with the Interim Filings on SEDAR at www.sedar.com.

Disclosure for Venture Issuers without Significant Revenue

Consistent with other junior companies in the mineral exploration industry, the Company has no source of operating revenue. The Company's unaudited Condensed Consolidated Interim Financial Statements for the three and nine months ended December 31, 2013 provide a breakdown of the general and administrative

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

expenses for the period under review and an analysis of the capitalized and expensed exploration and evaluation incurred on its mineral properties.

Forward-Looking Information

This MD&A contains certain forward-looking statements and information relating to the Company that is based on the beliefs of its management as well as assumptions made by and information currently available to the Company. When used in this document, the words "anticipate", "believe", "estimate", "expect" and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. This MD&A contains forward-looking statements relating to, amongst other things, regulatory compliance, the sufficiency of current working capital, the estimated cost and availability of funding for the continued exploration of the Company's properties. Such statements reflect the current views of the Company with respect to future events and are subject to certain risks, uncertainties, and assumptions. Many factors could cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. Aside from factors identified in the interim MD&A, additional, important factors, if any, are identified here.

Risks and Uncertainties

Early Stage - Need for Additional Funds

The Company has no history of profitable operations and its present business is at an early stage. As such, the Company is subject to many risks common to such enterprises, including undercapitalization, cash shortages and limitations with respect to personnel, financial and other resources and the lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investments and the likelihood of success must be considered in light of its early stage of operations.

The Company has no source of operating cash flow and no assurance that additional funding will be available to it for further exploration and development of its projects when required.

Although the Company has been successful in the past in obtaining financing though the sale of equity securities or joint ventures, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in the delay or indefinite postponement of further exploration and development of its properties.

Exploration and Evaluation

Exploration for minerals is a speculative venture involving substantial risk. There is no certainty that the expenditures made by the Company and/or its Subsidiary will result in discoveries of commercial mineral reserves.

Mining and development risk always accompany anticipated rewards, and uncertainties always exist where mineral properties are concerned. Uncertainties include the size, grade and recovery of a natural occurring mineral deposit. Although exploration and development efforts can outline a mineral deposit with a degree of certainty, ultimate grade and tonnages are never fully known until mining has been completed.

Metal and prices are also a significant factor in the development decision for a mineral property, as a mine may not be economically feasible in a period of depressed prices. Factors, beyond the control of The

Management's Discussion and Analysis
For the Nine Months ended December 31, 2013

Company may affect the marketability of any minerals discovered. Pricing is affected by numerous factors such as international economic and political trends, global or regional consumption and demand patterns, and increased production by current producers.

Operating Hazards and Risks

Mining operations involve many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes may occur. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production metals, any of which could result in damage to or destruction of mines and other producing facilities, damage to life and property, environmental damage and possible legal liability for any or all damage.

Title Risks

Although the Company has exercised the usual due diligence with respect to determining title to properties in which it has a material interest, there is no guarantee that title to such properties will not be challenged or impugned.

Environmental Regulations, Permits and Licences

The Company's operations are subject to various laws and regulations governing the protection of the environment, exploration, development, production, taxes, labour standards, occupational health, waste disposal, safety and other matters. Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in impositions of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a direction of stricter standards, and enforcement, and higher fines and penalties for non-responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact of the Company and cause increases in capital expenditures or productions costs or reduction in levels of productions at producing properties or requirements abandonment or delays in development of new mining properties.

Management's Discussion and Analysis For the Nine Months ended December 31, 2013

Competition and Agreements with Other Parties

The mining industry is intensely competitive in all its phases. The Company competes with other companies that have greater financial resources and technical capacity. Competition could adversely affect the Company's ability to acquire suitable properties or prospects in the future.

The Company may, in the future, be unable to meet its share costs incurred under agreements to which it is a party and it may have its interest in the properties subject to such agreements reduced as a result. Also, if other parties to such agreements do not meet their share of such costs, the Company may not be able to finance the expenditures required to complete recommended programs.

Price Volatility of Public Stock

In recent years securities markets have experienced extremes in price and volume volatility. The market price of securities of many early stage companies, among others, have experienced fluctuations in price which may not necessarily be related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any market for the Company's shares will be subject to market trends generally and the value of the Company's shares on the TSX Venture Exchange may be affected by such volatility.

Economic Conditions

Unfavourable economic conditions may negatively impact the Company's financial viability as a result of increased financing costs and limited access to capital markets.

Dependence on Management

The Company is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of the Company could result, and other persons would be required to manage and operate the Company.

Conflicts of Interest

The Company's directors and officers may serve as directors and officers, or may be associated with other reporting companies or have significant shareholding in other public companies. To the extent that such other companies may participate in business or asset acquisitions, dispositions, or ventures in which the Company may participate, the directors and officers of the Company may have a conflict of interest in negotiating and concluding terms respecting the transaction. If a conflict of interest arises, the Company will follow the provisions of the Business Corporations Act ("Corporations Act") in dealing with conflicts of interest. These provisions state that where a director/officer has such a conflict, the director must arrange a meeting of the board to disclose his interest and must refrain from voting on the matter unless otherwise permitted by the Corporations Act. In accordance with the laws of the Province of British Columbia, the directors and officers of the Company are required to act honestly, in good faith and in the best interests of the Company.

Approval

The Audit Committee has reviewed and approved the disclosure included in this MD&A. A copy of the interim and annual and MD&A's will be provided to anyone who requests it. Additional Information relating to the company can be found at the Company's website www.goldreachresources.com or www.sedar.com.
